## ABOUT THE COLLEGE

Vinayaka Mission's College of Physiotherapy was established in the year 1993 and situated in the Salem–Coimbatore National Highways in a pleasant and spacious campus. This is one of the pioneer colleges in the country with all modern facilities for the teaching-learning process. Vinayaka Mission's College of Physiotherapy is a constituent college of Vinayaka Mission's Research Foundation (Deemed to be University), Salem.

We prepare the student community in their professional discipline with an emphasis on moral values and service to develop competent graduates, who demonstrate concern for human health, provide comprehensive physiotherapeutic intervention, engage in clinical research and participate in community and professional services.

The college has good infrastructure facilities including various laboratories, like exercise therapy lab, Electrotherapy lab, Massage and Manipulation lab and a Research lab with modern equipments to provide hands-on training and research activities to the students.

The College of Physiotherapy has an experienced and student-friendly faculty team. Emphasis on interactive learning ensures that every student gains interest in all aspects of Physiotherapy and participates wholeheartedly in the theoretical and clinical sessions.

The teaching sessions strike a balance of clinical training, bedside clinics, clinical meetings, journal clubs, clinical case studies and project work, as well as active Community-Based Rehabilitation. Students are also benefitted through Guest Lectures, Panel Discussions, Symposiums, Seminars and Workshops for hands-on training throughout the year.

The students learn experiments with new approaches, challenges, and existing knowledge boundaries and design novel solutions to various critical problems through logical, analytical and critical thinking. The students are trained to demonstrate professional and ethical behaviour appropriate to the standard expected of a Physiotherapy Graduate. They engage in activities that contribute to the betterment of society and behave ethically and responsibly in a social environment.

Faculty Members and students are involved in research activities and present papers at National and International Conferences.

Extension activities serve the fundamental purpose of learning physiotherapy. Bringing students close to real people/patients through health awareness, community development programs and social work camps in nearby villages has sensitized them. Faculty members and students actively participate in blood donation camps and welfare programs for differently-abled children.
